### Community Support

| **Canadian Red Cross Health Equipment Loan** | The Health Equipment Loan Program (HELP), a national program of the Canadian Red Cross, provides health equipment to individuals dealing with illness or injury. Thanks to donors, local funders and partners; and with the support of dedicated volunteers and staff, the Health Equipment Loan Programs empower thousands of people each year to live more independently. HELP also plays an important role in the diversion of used equipment otherwise destined for landfill. HELP operates in the provinces of BC, Alberta, Ontario, New Brunswick, PEI, Nova Scotia, Newfoundland and Labrador, as well as the Yukon territory. |
| **Choice in Supports for Independent Living (CSIL)** | A self-directed option for eligible home support clients. CSIL clients receive funds directly from their local health authority to purchase and manage their own home support services. The websites below provide information about accessing the program in 4 health regions. Information includes services available, eligibility, cost and how to access the service. Home support services include but are not limited to: community nursing, assisted living, home support and community rehabilitation. |
| **Family Support Institute** | A provincial society that supports ALL families with a family member of any age, any disability (including mental health challenges) at no cost, anywhere in BC:  
- Social support, networking, information sharing, and emotional support through engaging and connecting families with resource parents/resource family members in their community.  
- Guides families to the services and supports available in their regions of the province.  
- Workshop training and delivery throughout BC on |

**For Everything That’s Community Health (FETCH)**

[https://www.divisionsbc.ca/provincial/fetch](https://www.divisionsbc.ca/provincial/fetch)

An online resource list with region-specific websites that help patients and health care providers find information on social and health resources within their own community, including counselling, crisis intervention, employment assistance, and agencies that provide support for various medical conditions. Some FETCH websites also contain lists of family physicians who are taking new patients.

Not all Divisions are on FETCH. To see if your community is, visit: [https://www.divisionsbc.ca/provincial/fetch](https://www.divisionsbc.ca/provincial/fetch)

**Maxxine Wright Community Health Centre**

The Maxxine Wright Community Health Centre in the lower mainland supports women who are pregnant or who have very young children at the time of intake who are also impacted by substance use and/ or violence and abuse. Women do not need to have their children in their care to receive support provided there is an ongoing relationship with the child.

Note: The current mandate is women who are pregnant or have a child under six months old at the time of intake. Once a woman has completed intake, can potentially work with her up to her youngest child turns 4 years old.
### Developmental Disabilities

<tr>
<td>CanFASD’s unique partnership brings together many scientific viewpoints to address complexities of FASD, with a focus of ensuring that research knowledge is translated to community and policy action. The mission is to produce and maintain national, collaborative research designed for sharing with all Canadians, leading to prevention strategies and improved support services for people affected by Fetal Alcohol Spectrum Disorder.</td>
</tr>
<tr>
<td>Working in partnership across the country – CanFASD is collaborating with national entities concerned with FASD, including the Public Health Agency of Canada (PHAC), Health Canada and NeuroDevNet. PHAC is the government of Canada agency responsible for public health in Canada and they fund a number of programs and activity related to FASD. Today, CanFASD researchers are currently taking part in almost all of the FASD research projects across Canada that are supported by PHAC. CanFASD researcher are currently leading 25 major projects related to FASD prevention, intervention and diagnostics. CanFASD connects researchers, graduate students and practitioners from communities and institutions across Canada, and internationally.</td>
</tr>
<tr>

### Developmental Disabilities Mental Health Services

Specialized mental health services for individuals who live with co-existing developmental disabilities and a mental illness, and/or challenging behaviours. Information about referral requirements and eligibility is provided on each Health Authority website:

**Fraser Health Authority**

[http://www.fraserhealth.ca/find-us/services/our-services?&program_id=10878](http://www.fraserhealth.ca/find-us/services/our-services?&program_id=10878)

### Inclusion BC

[http://www.inclusionbc.org/about-us](http://www.inclusionbc.org/about-us)

A provincial non-profit organization dedicated to promoting the participation of people with developmental disabilities in all aspects of community life. Inclusion BC works with a variety of levels of government on issues affecting adults with developmental disabilities, children and youth with special needs, and their families. While the focus is on advocacy at a provincial and national level, at times Inclusion BC is also a voice for individuals.

The website provides information about transitional resources and support for people with developmental disabilities, including:

- Assistance locating support
- Transition planning for families
- Links to publications
- A comprehensive list of website links (link to [http://www.inclusionbc.org/resources/weblinks](http://www.inclusionbc.org/resources/weblinks)) to a variety of topics, for example, Advocacy, Disabilities, Education, Financial Planning and Mental Health.

### Kids Brain Health Network

[http://www.neurodevnet.ca/](http://www.neurodevnet.ca/)

As a Canadian Network of Centres of Excellence (NCE), NeuroDevNet and its investigators work across traditional disciplinary boundaries with partners and stakeholders in academia, the community and not-for-profit sector, industry and government. Together, ensuring the findings are translated into tangible social, economic and health benefits to society as a whole.

This is done through transformative research - engaging in high-impact projects that challenge and advance current understanding. Innovative training opportunities are provided to seed a new generation of Canadian researchers dedicated to the same objectives, and empower communities with tools and information to promote earlier diagnosis, better treatment, and optimal outcomes for children today, and in the future.

NeuroDevNet’s current research projects focus on autism spectrum disorder, cerebral palsy, and fetal alcohol spectrum disorder, sleep, the social determinants of health and health economics, supported by collaboration with Core services in neuroethics, neuroinformatics, and knowledge translation.

**Fetal Alcohol Spectrum Disorder Resources:**

[http://www.neurodevnet.ca/resources/fasd-resources](http://www.neurodevnet.ca/resources/fasd-resources)
STADD is a partnership among schools and school districts, the Ministry of Children and Family Development (MCFD), Community Living BC (CLBC), WorkBC Employment Service Centres, the Ministry of Social Development and Social Innovation (SDSI), health authorities, the Public Guardian and Trustee and various community organizations. STADD provides eligible individuals and families the service of a STADD navigator. The navigator works to make sure individuals and families have the support of teams made up of representatives of different ministries, agencies, and service providers.

STADD is currently operating in Prince George/Haida Gwaii, Nanaimo/Courtenay, Surrey, Kamloops/Merritt and some surrounding communities. The program is expanding across the Fraser Region and is now available in Langley and Delta. A navigator is also based at the Granville Youth Health Centre in Vancouver. For the latest information on where the service is available, please call 1.855.356.5609 or 250.356.5609.

Youth between the ages of 16 and 24 may apply for the STADD service. Early access to STADD is encouraged for more effective transition planning. A social worker with the Ministry of Children and Family Development, school teachers or principals, and CLBC staff can also help individuals interested in the program to contact STADD.
### Advanced Care Planning

Online information about legal documents allowing people to plan for possible incapacity to manage personal health and well-being decisions and care:

- [http://www2.gov.bc.ca/gov/content/health/managing-your-health/incapacity-planning](http://www2.gov.bc.ca/gov/content/health/managing-your-health/incapacity-planning)

(This page includes the MOST Form)

### BC211

[http://www.bc211.ca/help-lines/](http://www.bc211.ca/help-lines/)

211 is a confidential, multilingual telephone and texting service available in Metro Vancouver, Fraser Valley, Squamish-Lillooet and Sunshine Coast Regional Districts. 211 provides free information and referral to a full range of community, social, and government services, and operates 24 hours a day, 7 days a week. The website provides information on helplines available in BC for services such as:

- Information on and referral to community resources and government services
- Health needs for victims of violence and human trafficking
- Addiction
- Shelter and Street help

### British Columbia Integrated Youth Services Initiative (BC-IYSI)

[http://bciysi.ca/](http://bciysi.ca/)

The BC-IYSI is a provincial movement of community agencies, government, donors, young people and families coming together to transform systems. Currently, the BC-IYSI involves over 70 partnerships across the province dedicated to empowering young people. Changing the way young people access health and social services across British Columbia.

Young people experience higher rates of mental illness and substance use than any other age group, and may face challenges in accessing the services they need to improve their wellbeing. By bringing together core services and supports, the BC-IYSI will support youth aged 12-24 and their families with easy access to care. Whether a young person needs support for anxiety or depression, wants to see a family doctor or is struggling with a stressful situation, the centre will help them get the services they need.

Working with partners, we will establish a branded network of “one-stop shop” youth centres, including the prototype site at the Granville Youth Health Centre. These centres will offer health, counselling, mental health, substance use and social supports, as well as youth and family support and navigation. We will also work with partners to help integrate and build on existing provincial online and telephone resources to strengthen a network of care for young British Columbians and their families, regardless of where they live.
| **Drug Cocktails**  
http://www.drugcocktails.ca/ | The Drug Cocktails website – “Facts for Youth about mixing Medicine, Booze and Street Drugs” (the “Site”) has been developed as a resource for youth and staff within Children’s & Women’s Health Centre of British Columbia Branch (C&W) for Provincial Health Services Authority and its branch agencies (PHSA)(C&W and PHSA together the “Societies”). There are support systems at the Societies which may not exist in other clinical settings and therefore adoption or use of this manual is not the responsibility of the Societies. Agencies other than the Societies should use Cocktails as a guideline for reference purposes only. The contents of this website were current at the time of development in July 2013. The Societies are not responsible for information that has changed after that time, whether incorporated into the Site or not. |
| **HealthLinkBC**  
http://www.healthlinkbc.ca/servicesresources/811/ | HealthLink BC, which is part of the Ministry of Health, provides access to non-emergency health information and advice in British Columbia, a website (visit https://www.healthlinkbc.ca/), a mobile app, and a collection of print resources.  

8.1.1 is a free-of-charge provincial health information and advice line. By calling 8.1.1, individuals can speak to a health services navigator, who can help them find health information and services (including information about mental health services) or connect them directly with a registered nurse, a registered dietitian or a pharmacist. Any one of these healthcare professionals will help individuals get the information they need to manage their health concerns, or those of their family.  

Call 8.1.1 toll-free in BC (or 7.1.1 for hearing-impaired assistance) to speak with a health service navigator, registered nurse, registered dietitian or pharmacist.  

Translation services are available in over 130 languages. After dialing 8.1.1 individuals will be connected with an English speaking health services navigator. To get service in another language, simply state the language they are looking for (example say “Punjabi”) and an interpreter will join the call. |
| **Interim Federal Health Program (IFHP)**  
http://www.cic.gc.ca/english/refugees/outside/summary-ifhp.asp | The Interim Federal Health Program (IFHP) provides limited, temporary coverage of health-care benefits to people in the following groups who aren’t eligible for provincial or territorial (PT) health insurance:  
- Protected persons, including resettled refugees;  
- Refugee claimants; and  
- Certain other groups.  

The IFHP does not cover the cost of health-care services or products that a person may claim (even in part) under a public or private health insurance plan. The IFHP does not coordinate benefits with other insurance plans/programs so co-payments aren’t possible. |
### Non-insured health benefits for First Nations and Inuit (NIHB)

A federal program providing health coverage for a specified range of medically necessary items and services that are not covered by other plans and programs

Services covered include:
- Dental care
- Vision care
- Medical supplies/equipment
- Drugs/pharmaceuticals
- Mental health counseling
- Transportation related to accessing medical services

### Poverty Intervention Tool

This document has useful intervention resources and includes helpful links for both patients and practitioners.

### Pride Education Networks
[http://pridenet.ca/](http://pridenet.ca/)

Pride Education Networks is a group of educators and advocates, regardless of sexual orientation/expression, who value the importance of a safe, respectful and inclusive learning environment for all.

The group is made up of teachers, counsellors, support staff, child care workers, special education assistants, and community & youth workers in the school system. As well as parents, college/university professors, pre-service teachers, retired educators, school administrators and school board trustees.

**Community Groups and Services for LGBT Youth in BC**

### Rapid Access to Consultative Expertise (RACE)
[http://www.raceconnect.ca/](http://www.raceconnect.ca/)

RACE is an innovative model of shared care involving a telephone advice line where family physicians can call one phone number and choose from a selection of specialty services for real-time telephone advice.

In the Rapid Access to Consultative Expertise (RACE) model, the telephone call is routed directly to the specialists cell phone or pager for “just in time” advice. For information about availability of services, visit the website.

For a list of specialty areas, see:
[http://www.raceconnect.ca/services-available/](http://www.raceconnect.ca/services-available/)

### Sex and U
[http://www.sexandu.ca/](http://www.sexandu.ca/)

SexandU.ca takes a real-life approach to the questions and issues around sex and sexuality that matter most to Canadians. From talking about sex, to lifestyle choices, to contraception awareness and sexually transmitted infections, SexandU.ca provides accurate, credible, and up-to-date information and education on topics related to sexual and reproductive health.

SexandU.ca is an initiative of the Society of Obstetricians and

| FIND Services and Resources Guided Search  | The HealthLink BC FIND Services and Resources Directory provides listings for health services offered by the provincial government, provincial health authorities, and non-profit agencies across British Columbia. Individuals can search for walk-in clinics, emergency rooms, hospitals, mental health program, home care programs, pharmacy services, laboratory services, and more. Search by keyword, or try guided search to narrow down search results by categories such as mental health. Mental health services include assessment of intake programs, counselling services, crisis intervention programs, and specialty and support programs.  
| http://www.healthlinkbc.ca/services/resources/guidedsearch  |  

| HeretoHelpBC.ca  | HeretoHelp is a website of the BC Partners for Mental Health and Addictions Information. The BC Partners are a group of seven leading provincial mental health and addictions non-profit agencies: AnxietyBC, BC Schizophrenia Society, Centre for Addictions Research of BC, Canadian Mental Health Association’s BC Division, FORCE Society for Kids’ Mental Health, Family Services of the North Shore’s Jessie’s Legacy Program and Mood Disorders Association of BC.  
| http://www.heretohelp.bc.ca/  |  

| Kelty Mental Health Resource Centre  | The Kelty Mental Health Resource Centre is a provincial resource centre that provides mental health and substance use information, resources, and peer support to children, youth and their families from across BC. The Resource Centre also provides peer support to people of all ages with eating disorders. All services are free of charge, and individuals can reach the Resource Centre staff over the phone, in person, or through email.

<td>with mental health disorders. Featuring 15 distinct modules, Learning Links addresses anxiety, depression, self-harm, OCD, psychotic disorders and more. A survey of early physician testers showed that the majority felt the modules increased their understanding of mental health and substance use disorders (85%), increased their ability to identify disorders (89%), ability to treat (82%) and confidence in treating (85%). Physicians who complete the modules are eligible for self-directed continuing education credits. Learning Links was created by an expert team led by Dr. Jana Davidson, Psychiatrist-in-Chief at BC Children's Hospital, as part of the CYMHSU Collaborative. Visit <a href="https://learninglinksbc.ca/">https://learninglinksbc.ca/</a> to view the modules and get started.</td>

<td>mindcheck.ca</td>
</tr>
<tr>
<td><a href="http://mindcheck.ca/">http://mindcheck.ca/</a></td>
</tr>
<tr>
<td>mindcheck.ca is a youth friendly, interactive website for BC teens and young adults ages 13-25. The site aims to encourage early detection of mental health challenges and connect youth to resources to improve their mental health. The website provides information on early signs and symptoms and confidential screening tools (quizzes) for depression, anxiety, social anxiety, stress, alcohol and drug use, psychosis, body image and eating problems. The quizzes provide feedback with recommendations that are reflective of the results generated. Support includes links to self-care tools and assistance in connecting to support and local professional resources. Families, friends and adults who work with young people can learn how they can provide support. Educational resources are available for teachers to increase their students’ awareness and understanding of mental health. The goal of mindcheck.ca is to enable young people to identify mental health challenges early on and to take action to prevent them from becoming more serious.</td>

</table>
people with Autism Spectrum Disorder (ASD) by engaging employers and raising awareness about the value of hiring people with diverse abilities. For more information about the initiative, see [http://readywillingable.ca/](http://readywillingable.ca/) or contact Anjela Godber, Autism Outreach Manager at [anjela@pacificautismfamily.com](mailto:anjela@pacificautismfamily.com).

Employment Works is an employment readiness program for individuals with ASD between the ages of 15-29. For further information about this program please see: [http://worktopia.ca/](http://worktopia.ca/)

| **Rapid Access Clinics (RAC), Mental Health Fraser Health**[^1] | The Rapid Access Clinic (RAC) provides quick access to psychiatric consultation in order to provide a patient’s family doctor or nurse practitioner with treatment recommendations. The Rapid Access Clinic provides quick access to an appointment with a psychiatrist and nurse from the patient’s community Mental Health and Substance Use Centre. The psychiatrist will provide a patient’s family doctor or nurse practitioner with recommendations for treatment, medications and/or diagnoses. Rapid Access Clinic services are provided through Mental Health and Substance Use Centres in several Fraser Health communities. For information, see: [http://www.fraserhealth.ca/media/RAC_Brochure.pdf](http://www.fraserhealth.ca/media/RAC_Brochure.pdf) |
| **The Institute of Families for Child and Youth Mental Health / F.O.R.C.E. Society for Kids’ Mental Health**[^2] | Parents in Residence (PiR) and Youth in Residence (YiR) in many communities across BC provide peer support, education, resources and coaching to families with children and youth with mental health challenges. Also offer mental health literacy education and work alongside mental health professionals and systems to best understand and meet the mental health needs of families. There are PiRs in communities in every health region in BC. Check the website to see if there is a PiR or YiR in your community. For those without a PiR or YiR in their community, we have PiRs and YiRs with a provincial mandate who work out of the Kelty Mental Health Resource Centre at BC Children’s Hospital. |

## Student Health

| **BCIT Student Health Services**  
http://www.bcit.ca/healthservices/ | BCIT Student Health Services is a walk-in clinic located on the Burnaby campus providing a variety confidential health services and are committed to creating a culture of wellness to meet your physical, mental and social well-being.  
Year round, Student Health Services provides active BCIT students and staff with on campus care and support for your physical and mental health needs.  
BCIT Student Health Services will see currently employed BCIT faculty and staff for acute care reasons only, such as illness or an injury. Faculty and staff are expected to follow up with their family doctor for chronic or ongoing medical conditions and preventative health screening. |
|---|---|
| **Simon Fraser University Health and Counseling Services**  
https://www.sfu.ca/students/health/ | The goal at Health and Counselling is to provide effective health care within SFU. The health clinic (doctors and nurses), counselling, psychiatrist, physiotherapist, and health promotion team are available to collectively and positively influence students health and well-being. |
### AgedOut.Com

**Website:** [https://agedout.com/](https://agedout.com/)

- AgedOut.com is for youth and young adults who are or have been in government care in BC.
- AgedOut.com provides interactive information about services and supports along with valuable life lessons.
- Youth and Young Adults and earn while they learn. The more you learn the more you earn with real world perks.
- AgedOut.com delivers a single point of access for former youth in care to find resources that meet their needs and connect with online and in-person support.
- It is based on the latest interactive technology and has the potential for expansion for key partners and other Ministry partners to add Quests and information to this platform.
- AgedOut.com provides an up-to-date access of services available in British Columbia, instrumental life skills training, and signposts to emergency assistance.
- Delivers life skills curriculum in a way that meets a variety of learning needs.

### Canuck Place Children’s Hospice – Youth Transition Program

**Website:** [https://www.canuckplace.org/about-us/](https://www.canuckplace.org/about-us/)

Canuck Place Children’s Hospice is BC’s pediatric palliative care provider for children with life threatening illnesses and their families.

The document Canuck Place – Youth Transition Program provides a comprehensive list of links to transitional resources for families to contact, including: housing and living, health, wellness and sexuality, social activities, assistive technology and many more. See: [https://www.canuckplace.org/resources/](https://www.canuckplace.org/resources/)

### College of Physicians & Surgeons British Columbia

**Website:** [https://www.cpsbc.ca/physician_search](https://www.cpsbc.ca/physician_search)

The College of Physicians and Surgeons of British Columbia regulates the practice of medicine under the authority of provincial law. All physicians who practice medicine in the province must be registrants of the College.

This website provides direct access to the College’s online physician directory, which extracts contact information, office locations and other relevant details about a physician directly from the public register in real time.

### Community Living British Columbia (CLBC) – Youth in Transition

CLBC funds supports and services through service agencies for adults with developmental disabilities and their families in BC. CLBC works in collaboration with youth and their families and other government organizations and ministries to support youth transitioning to adulthood.

The CLBC website explains a 3-step process for getting services through CLBC, and provides several resources including:

**UBC Continuing Professional Development**

[http://ubccpd.ca/course/youth-transition](http://ubccpd.ca/course/youth-transition)

Transitioning to Adult Care for Youth with Chronic Health Conditions and Disabilities.

This free online course is designed to educate health providers on ways to better facilitate the continuity of care for youth with chronic health conditions and disabilities who are transitioning from paediatric care to the adult care system. The course is divided into four separate 15-minute modules covering the following topics: understanding transition for youth with CHC/Ds, development trajectory and implications for care, engaging youth and promoting adherence, and caring for youth with significant developmental and intellectual disabilities. Earn CME credits for completing one or all four modules for up to 1.0 Mainpro+/MOC Section 1 credits.

| | For Families  
| | The Family Toolkit for transition was created by and for parents and families. It contains resources to support families as they work with their youth to plan, prepare and transfer into adult health care.  
| | From questions about leaving pediatric care, to education, social networking, sexual health resources, and planning for the future, ON TRAC has tips and resources to help families and their youth.  
| | For Youth  
| | The Youth Toolkit for transition was created by and for youth. It contains tools, tips and ideas to help youth ages 12-24 years plan and prepare for adulthood and adult health care.  
| **Pathways** | Pathways is an online resource that facilitates optimal patient referrals. This tool, coordinated by individual Divisions of Family Practice, contains a directory of specialists and specialty clinics with current and pertinent information (e.g., wait times, sub-speciality, language) to enable appropriate referrals. In addition, Pathways contains categorized and searchable physician resources, |
patient handouts and screening tools, and some communities also list allied health professionals.

When specialists (e.g., pediatricians) register their practice profile/parameters on Pathways or a family physician signs up for Pathways, they have access to the directory of all physicians listed.

For more information, please visit https://www.divisionsbc.ca/provincial/pathways or contact the local Division of Family Practice (https://www.divisionsbc.ca/provincial/home) to inquire if Pathways is available in a community.
