

PATIENT ATTACHMENT MECHANISM & PATHWAYS STATUS

DIVISION	LOCATING A FAMILY PHYSICIAN	LOCATING AN ADULT SPECIALIST
<p>Abbotsford Division of Family Practice</p> <p>T: 604.746.3392 W: https://www.divisionsbc.ca/abbotsford/findadoctor</p>	<p>Patients can access a list of family physicians accepting patients. However, at the time of printing this document, there were no physicians taking new patients and a wait list established. However, Abbotsford has a youth health centre that accepts transitioning patients. Community pediatricians wanting to transition a patient can contact Dr. Elizabeth Watt at 604.746.3392 (fax is 604.746.7399). This clinic runs three times a week, and includes nurse practitioners (who provide consistent care), family physicians, medical residents and an RN. Their website is http://ayhc.ca/. The clinic sees patients until the age of 24, and their goal is to attach these patients by that time and have them ready to navigate the adult healthcare world.</p> <p>Pathways: This Division has Pathways set up and it does include family physicians accepting referrals, but they rarely note availability to take new patients.</p>	<p>Pathways: This Division has Pathways set up and it does include most specialists.</p>
