

PATIENT ATTACHMENT MECHANISM & PATHWAYS STATUS

DIVISION	LOCATING A FAMILY PHYSICIAN	LOCATING AN ADULT SPECIALIST
<p>East Kootenay Division of Family Practice</p> <p>W: https://www.divisionsbc.ca/east-kootenay</p>	<p>This Division does not have a formal attachment mechanism. The Pediatrician or the patient/family would call around to the clinics and see if anyone will take them. Often GPs are more willing to take a new patient if another family member already sees that GP. Also, if the Pediatrician were to speak with the GPs (they all know each other), that may also help. In most cases, patients have a GP who then referred them to the pediatrician, and they experience care from both.</p> <p>Pathways: Do not currently have Pathways, but plan to explore it in the future if some of the specialists in the area or the MSAs with the hospitals are willing to joint fund it.</p>	<p>Pathways: Do not currently have Pathways, but plan to explore it in the future if some of the specialists in the area or the MSAs with the hospitals are willing to joint fund it.</p>
